Destined to be America's
Leading Commer-
cial Peach

RIO OSO GEM

The World's Largest Peach

Sample of RIO-OSO-GEM Grown in Harrison's Orchards at Berlin, Maryland.
Sold only by Harrison's Nurseries in numerous states.

An amazing feature of the Rio-Oso-Gem is, it will take on a good bright red color and yellow background two weeks before ripening, and even ten days before actual ripening time the percentage of bright red color is decidedly more than most other varieties. When Rio-Oso-Gem is ready to pick and ship it has practically a solid red color. There is no other Peach known that carries such a high percentage of red color on the fruit as this marvelous Rio-Oso-Gem.

EXPERT FRUIT GROWERS SAY O. K.

Rio-Oso-Gem has now fruited in practically every Peach district of the Union. Veteran Peach growers of the nation are loud in their praise of this startling variety. Rio-Oso-Gem has passed the experimental stage and proven an outstanding commercial variety, superseding the famous Elberta of the Victorian era.

BIGGEST PEACH ON EARTH

The Rio-Oso-Gem is a perfect freestone, form is globular, slightly elongated, of extremely large size, averaging in diameter from $2\frac{3}{4}$ to $3\frac{3}{4}$ inches; deep yellow flesh, very fine grain, firm texture, with very excellent flavor, being rich, sweet and slightly spicy. The coloring is unique, being a beautiful dark crimson-red, running out to lighter crimson and into a rich mottle of crimson over the orange-yellow ground color. It is a good transcontinental shipper.

MOST BEAUTIFUL PEACH ON EARTH

1946 PRICES OF RIO-OSO-GEM

U. S. Plant Patent No. 84

	1 to 9 Trees	10 to 49 Trees	50 or More Trees
1-Yr. Budded Trees:			
5 to 6 ft., $1\frac{1}{16}$ to $\frac{7}{8}$ in. cal.	\$2.25	\$1.90	\$1.60
4 to 5 ft., $\frac{9}{16}$ to $1\frac{1}{16}$ in. cal.	2.00	1.65	1.35
3 to 4 ft., $\frac{7}{16}$ to $\frac{9}{16}$ in. cal.	1.75	1.40	1.10
2 to 3 ft., $\frac{5}{16}$ to $\frac{7}{16}$ in. cal.	1.50	1.20	.90

RIO-OSO-GEM IDEAL FOR HOME ORCHARDS

Two Weeks Later Than Elberta

The Rio-Oso-Gem would be a Peach of commercial importance when ripening at any time during the Peach season, but it is very fortunate that it ripens two weeks later than Elberta, which puts it at a time when there is no other variety of commercial importance as a competitor, and fills a long looked-for gap in commercial production, ripening when the markets are clamoring for Peaches—this variety has sold at very much higher prices than Elberta and J. H. Hale. To prolong your Peach shipping season, we highly recommend to you planting the Rio-Oso-Gem. Harrison's have planted twelve thousand Rio-Oso-Gem in their own famous orchards. We have the utmost faith in the Rio-Oso-Gem, and we will also make future plantings of this remarkable Peach.

There is a brilliant future in store for the progressive orchardist who plants Rio-Oso-Gem Peach trees.

Protected by U. S. Plant Patent No. 84

Exclusive Propagation and Sales Rights of the Rio-Oso-Gem in the Following States Granted to Harrison's:

Alabama, Arkansas, Connecticut, Delaware, District of Columbia, Florida, Georgia, Kansas, Kentucky, Louisiana, Maryland, Maine, Massachusetts, Mississippi, New Hampshire, New Jersey, New York, North Carolina, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Vermont, Virginia and West Virginia. Also sales rights in Ohio, Indiana, Illinois, and Missouri.

Bud-Selection THE KEY TO BETTER FRUITS

Cutting Buds

Harrisons' "Bud Strains"

Some fifty years ago, and almost every year since, Harrisons' have planted orchards, not alone for fruit but principally to secure the type of parent fruit tree that was characteristic of a "variety" dominant in bearing qualities coupled with health, vigor and ability to withstand changeable climatic conditions. This type of tree became the parent supplying the budding sticks for future orchards in America and true-to-name varieties were assured.

Save Years of Waiting

Bud-Selection Plus Whole Root Propagation Gives Harrisons' Trees Year Ahead Start

The root is the heart of a tree. It enables nutrients in the soil to reach the tops and branches, causing growth. Every fruit tree we sell and grow is scientifically propagated on whole root seedlings, resulting in extra vigorous top and fruit growth. It costs more to grow trees by this method but results are what count. You can count on Harrisons' Trees to give you bumper crops of Quality Fruits years ahead of ordinary trees.

Growing practices do make a difference.

Now is the Time to Plant

U. S. Government authorities are urging a large increase of Family Tree Plantings to take care of the alarming decline of fruit production.

Health authorities recommend eating twice as much vitamin-packed fruit. Many well known authorities predict that within a few years fruit production will be so low that only those who grow their own will have enough to supply their family requirements.

Make your planting this season. Use Harrisons' early-to-bear trees and plants.

Buying Fruit Trees is an Act of Confidence

Your future success and profit from your investment depends on factors you cannot see—the skill and experience of the nurseryman, the type of parent tree that is used in propagation, the willingness of the nurseryman to stand back of every one of his claims.

For 62 years the Harrison organization has been supplying fruit trees to an ever-widening circle of customers, until today Harrisons' Nurseries are the largest growers of fruit trees in the world. This demand we believe is due to the profit-producing proven heavy yielding, bud selected strain fruit trees we are producing plus absolute dependability and square dealings. Thousands of reports from enthusiastic customers, hundreds of year-in-and-year-out customers, are proof that you can depend on Harrisons' Fruit Trees. You buy them without risk and with assurance they will yield you the greatest possible profit.

Message From HARRISONS'

Dear Friends:

For sixty-two years the business of the Harrisons' has been to grow Fruit Trees, Roses and Ornamental Nursery Stock, also commercial fresh fruit growers—this business has grown and developed only through a thorough understanding of the science of horticulture in all its phases with practical use.

When it comes to fruit trees, you can buy them at most any price, but the trees that will produce the biggest crop of really worth-while and saleable fruit, cannot be expected from undernourished trees produced in a haphazard manner with the sole idea of seeing how cheaply they can be grown, thus disregarding standard grades, sizes and specifications and careless as to their parentage.

Now when you buy nursery stock—remember all of it is a living plant—the pedigree, or parents, play an important part in the future results of the very tree you buy—the "hidden value" is the inborn inheritance that becomes the final quality, type, strain, size, color and productiveness so necessary in the future performance—and right here is the very feature which makes HARRISON grown nursery products have superior merits.

HARRISONS' Fruit Trees and Small Fruits are true to name, earlier to bear, and yield larger crops because they are scientifically propagated from SUPER SELECTED STRAINS. Likewise, the parent plants used for propagating our Ornamentals are of the finest types for their respective varieties.

In closing, may we personally take this opportunity of thanking our many, many customers for their continued confidence, for which we are sincerely grateful.

Sincerely yours,

HARRISON NURSERIES,
Harrison Brothers, Props.
G. Hale Harrison, Gen. Mgr.

62 YEARS
LEADERSHIP

OVER 4,000
ACRES

This is Your PROTECTION

Every customer is assured of Harrisons' Hi-Quality Trees and Plants at all times. Expert growing on proper soils, careful digging and packing is Harrisons' policy on every order. Every tree and plant we ship is guaranteed to be strictly first class, free from injurious diseases and insects and to reach you in good condition.

Any time trees or plants are received that do not meet these standards they will be replaced free of charge or your money refunded.

Continued growth depends on soil, weather conditions, planting and after care. After ten days it is mutually understood that the nursery stock is satisfactory; however, we will replace nursery stock that dies from unavoidable causes at half price, if notified within two months after its arrival.

JUMBO

Fruit Trees Big Roots—Bear Early

NOW, everyone can grow extra large, rich colored, extra rich flavored, healthful, **VITA-MIN PACKED FRUIT** in your own back yard

SAVE TWO TO THREE YEARS BY PLANTING SUPER-SIZE FRUIT TREES HAVING JUMBO GROWTH

Best Trees Obtainable—Carefully Selected—Specimen Trees

Time is money, therefore, for the additional expense of a few cents per tree you can plant Jumbo size fruit trees and eat the fruit from them surprisingly soon after planting. The Super-Size fruit trees, being especially grown as Jumbo trees, are the strongest growers. They are exceedingly vigorous, very hardy, and produce tremendous crops of fruit. These are ideal trees for the home garden.

Your Selection. Can be assorted varieties—Apples, Peaches, and Pears—consisting of only the varieties as listed on this page.

JUMBO SIZE—6 TO 8 FEET, HEAVILY BRANCHED			
Each	\$ 3.00	10 for	\$ 25.00
3 for	8.70	25 for	58.75
6 for	16.50	50 for	100.00
		100 for	\$175.00

THE SPECIAL OFFER ONLY ON FOLLOWING VARIETIES, SUPER-SELECTED, TRUE-TO-NAME, JUMBO-SIZE TREES: Varieties are listed in their order of ripening. All kinds are suitable for home planting.

APPLES: Large Transparent (Lodi), Starr, Red Gravenstein, Wealthy, Early McIntosh, Super Red McIntosh, McIntosh Red, Triple Red Delicious, Bright Red Jonathan, Yellow Delicious, Scarlet Red Stayman, Cortland, Solid Red Winesap, Red Spy, Stayman Winesap and Rhode Island Greening.

CRAB APPLES: Hyslop and Transcendent.

PEACHES: Golden Jubilee, Cumberland, Champion, Hale Haven, Hiley, Belle of Georgia, Elberta, Brackett and Salberta.

PEAR: Kieffer.

NECTARINE: Sure Crop.

Peaches

*A bright and PROFITABLE CASH FUTURE
Plant a PEACH ORCHARD
this Spring*

The peach grower has a bright and profitable cash future—we advise you to plant a peach orchard this year, as the number of peach trees in bearing is the smallest of any time during the past fifty years.

THE REASONS BACK OF GROWING SUPERIOR STOCK

- A—Our organization has over 60 years experience.
- B—Every step in growing under the personal supervision of the Harrison Brothers.
- C—One hundred and fifty thousand trees in Harrison Brothers orchards from which our propagating trees are selected.
- D—Use of modern methods for planting, cultivating and digging.
- E—Over 4,000 acres of various types of soil.
- F—Ideal soil and climatic conditions.
- G—Co-operation with leading horticulturists and experimental stations all over the world.

VERY EARLY VARIETIES

RED BIRD. Superior. See next page.

REDHAVEN. Superior. See next page.

GOLDEN JUBILEE. Superior. See next page.

OTHER VERY EARLY VARIETIES

CUMBERLAND. An outstanding favorite early white Peach. Is a comparatively new, white, nearly freestone variety that was developed by the New Jersey Experimental Station. The fruit resembles Belle of Georgia, both in appearance and quality, although it ripens about the same time or a little before Carman.

EARLY ROSE. Very early. Another favorite commercial Peach. White, cling, medium large size for an early Peach; high bright red skin, sweet, delicious flavor. Good shipping, making it a new favorite among commercial varieties.

GREENSBORO. White, freestone, extra large for such an early Peach. One of the handsomest, being a large, yellowish white with crimson cheek; flesh is white and of average quality. Exceedingly hardy, being an extra heavy, prolific bearer and adapted for wide variations in Peach regions.

JUNE ELBERTA. A big, handsome red and gold Peach, highly colored, excellent quality and a dandy home Peach, being a new variety. One of the earliest of the good yellow-fleshed Peaches, this semi-freestone variety quickly returns cash dividends before later varieties reach the market.

TRIOGEM. (N. J. 70). Early, oval, red all over, medium large, yellow, freestone.

HARRISON'S HARDY PEACH TREES

We absolutely guarantee Harrison-grown peach trees, variety for variety, to be as hardy or harder than trees grown in any locality north of us.

REDHAVEN PEACH
—They Taste as
Good as They Look

The Sensational **REDHAVEN**

**Tops All Extra Early Peaches, Earliest Yellow
Freestone Peach**

**THE NEW EARLY RIPENING YELLOW PEACH THAT
RIPENS ABOUT 10 DAYS BEFORE GOLDEN JUBILEE**

The most promising early ripening yellow freestone Peach ever introduced. A cross between Hale-Haven and Kalhaven made at the South Haven, Michigan, Experimental Station. Brilliant red color with creamy yellow background, smooth skin, almost fuzzless. Reddens before it ripens. Bears heavy crops and should be thinned for best results. Every grower should try REDHAVEN. We have a good supply of genuine Redhaven trees this season. The demand for this variety is heavy, so order early.

HALE-HAVEN PEACH—Extra Large, Fine Flavored

**HARRISON'S'
SUPER QUALITY
FRUIT TREES
BEAR HEAVIEST
GROW FASTEST
AND
LIVE LONGEST**

Hale-Haven

Early mid-season. Ripens just after Golden Jubilee has been harvested and about 14 days ahead of Elberta. Yellow freestone, large, high red color, firm, fine flavored. It takes on red color early and the peaches show good red color several days before ripening, which gives it a distinct advantage for marketing. When allowed to ripen fully upon the trees its flavor is undoubtedly the best of any yellow Peach. Tree is an extra strong grower and produces a bumper crop of fruit each season. Very hardy in fruit bud. One of its parents is J. H. Hale, from which it inherits its large size and fine color. The other parent is South Haven from which it attains hardiness, large crops yearly and strong growth. It is the best variety ripening between Golden Jubilee and Elberta and should be planted in every orchard.

GOLDEN JUBILEE PEACH—Yellow, Excellent Quality

A LEADER and What a PEACH! **GOLDEN JUBILEE**

Early. The supreme early yellow Peach. Commercial Peach orchardists for a century have been looking for an early Peach of high quality, fine flavor, yellow, freestone, attractive color and firm texture, and eventually they have found it in the marvelous Golden Jubilee. This variety is a variation of recent introduction of new varieties and is by far better than any early variety of commercial importance which has been introduced in many years. It ripens about four days ahead of Carman.

Red Bird

Earliest of All Peaches

Very early. White, cling, extra large with a bright red blush, the first Peach of large size to ripen; the greatest very early money maker. Supply of trees is very limited for spring, 1946.

Plant

**Harrisons'
Superior
Strain**

**and Reap
the Cash
Benefits**

Mid-season. Yellow, freestone. Fruit is large to extra large; golden yellow with brilliant shades of red; firm, juicy, rich, sweet and good flavor. Elberta has the greatest international reputation of any Peach. It has been the standard for all other Peaches almost since the date of its introduction. The coloring of Elberta is practically perfect. The rich, yellow skin is almost entirely covered with dark red blush upon the sunny side. The attractive appearance and the uniform large size serve to sell it almost on sight. We offer original strain trees which is the best strain obtainable.

Save Disappointment—Plant Only Harrison ORIGINAL STRAIN Elberta

Today, there are more than seven distinct types and strains of Elberta, bearing fruit in the orchards of this country. To compare the various sizes, shapes, texture and red coloring of these Elberta with those grown "on original strain trees" gives sufficient reason why they sold this year at a premium of \$1.00 to \$2.00 per bushel on the New York and other leading fruit markets.

ELBERTA
Original Strain
The Leading Peach

America's No. 1 Peach—Elberta. There are more Elberta Peach trees in bearing than any other variety on earth.

Belle of Georgia

(Belle)

The Famous White
Peach Companion
of ELBERTA

BELLE OF GEORGIA
Finest Flavored White Peach

- Fruit Large
- Delicious Flavor
- Attractive
- Big Crops
- Very Hardy
- Easy to Grow

The
Queen of Flavors
The Best White
Mid-Season Variety

Ripens mid-season. Color creamy white with red cheek. Flesh white, red near pit. Size large, freestone. Belle of Georgia, for some time, has been recognized as the best all-around white Peach on the market. It is easily the best shipping white Peach of its season, ranking almost with Elberta in this respect. Because of its many desirable qualities, it has become standard in the large commercial orchards, and you can find few orchardists of any importance who do not have a block of Belle in their orchards. These men know from experience just what varieties pay best and endorse it highly.

HILEY WHITE—EARLY MID-SEASON

Early mid-season. Bears huge crop of fancy Peaches. White, freestone, medium size, highly red colored and is a very handsome Peach of exceptionally good flavor. Tree is strong grower, very healthy and an extra heavy bearer. You can depend on Hiley to bear heavy crops year after year. The marvelous color and wonderful flavor have made it popular on the markets. Hiley resembles Belle of Georgia but ripens about 10 days earlier.

HARRISONS'
HI-QUALITY
TREES

Harrisons' Peaches

ARE A COLLECTION OF
THE WORLD'S BEST

Sullivan's EARLY ELBERTA

An Early Ripening
Bud Sport of Elberta
MID-SEASON YELLOW

FREESTONE

Here is the early ripening strain of genuine Elberta growers have been wanting. Discovered by Mr. Sullivan in a Georgia orchard. Identical to Genuine Elberta in every characteristic except it ripens about 7 days earlier. Yellow freestone, firm, juicy, rich, good flavored. Equally attractive as Elberta and is a good keeper. Good for either home or commercial planting.

Early Elberta

Early mid-season. Yellow, freestone, large, lemon-yellow with a dark cast, blush with vivid red. Beautiful appearance, high quality, being somewhat similar to Elberta, although a trifle better flavor, rich golden tender flesh, yet firm and has a delightful flavor; excellent for canning.

Sullivan's
EARLY ELBERTA
The New Early
Ripening Elberta

GOLDEN EAST. (N. J. 87.) Early mid-season, very large, high red color, yellow, freestone.

ROCHESTER. Early mid-season. Yellow, freestone, large, covered with mottled red blush; flesh yellow stained with red at pit, very good quality, prolific bearer. One of the best early mid-season yellow freestone Peaches for nearby markets, and highly desirable for canning.

SOUTH HAVEN. Early mid-season. Yellow, freestone, large, handsome, uniform size, delicate flavor, ripens about 15 to 18 days ahead of Elberta. Tree is very hardy, good grower and a consistent heavy bearer, adapted to cold climates; produces bumper crops in mild climates.

VALIANT. Early mid-season. Seedling of Elberta. Yellow freestone, productive. A new Canadian variety.

Early Mid-Season Peaches

HALE-HAVEN. Superior. See page 6.

HILEY. Superior. See page 7.

OTHER EARLY MID-SEASON VARIETIES.

CHAMPION. A Good Home Peach.

White, freestone, very large; creamy white with red cheek, sweet, juicy, very high flavor. Champion has lost its past commercial importance because it will not carry satisfactorily under refrigeration, but as a home garden or a roadside Peach, it is one of the best. Tree is hardy, large grower and productive.

Peaches

Late Ripening Varieties

BRACKETT. Mid-season late. The fruit is rich yellow with dark carmine cheek. Size is as large or larger than Elberta and much better flavored. Ripens 7 days later than Elberta.

LIZZIE. Late, distinct type of Elberta, very large, freestone, yellow, which ripens 24 to 26 days later than Elberta, having same prominent coloring characteristics as its parent.

SALBERTA. A Late Commercial Peach. Yellow, freestone, large, being a satisfactory cross between Elberta and Salwey. Salberta inherited the size, quality and productiveness of Elberta, and inherited the lateness in season of Salwey. This new variety is being planted commercially in many Peach-growing sections. Ripens about 20 days later than Elberta.

SHIPPERS LATE RED. Mid-season late. Large, round, yellow, freestone; very attractive. Ripens 3 days later than Elberta.

RIO-OSO-GEM. Late. See page 2 for description and prices Starts to ripen 14 days later than Elberta.

VERY LATE RIPENING VARIETIES

KRUMMEL'S (Krummel's Late October). Yellow, freestone; extra large, round, deep yellow with a blush of carmine on the sunny side—fine flavor.

SALWEY. Very late. Yellow, freestone.

WHITE HEATH CLING. Large, late cling, fine flavor, good home Peach.

A NATIONAL SCARCITY OF FRUIT TREES

There is a drastic shortage of fruit trees throughout the nurseries of the United States; as a matter of fact, the smallest supply available for 1946 orchard plantings that there has been at any time during the past fifty years. A recent national survey shows that fruit trees will even be more scarce during the next two years than now. Play safe—act quick—place your order now while trees are available.

YOUNGER BEARING

Do you want your trees to come into bearing at an early age? It is a recognized fact that trees propagated direct from bearing trees will commence to fruit at an earlier age than trees that are propagated from non-bearing scions. Harrison Grown Fruit Trees, due to the fact they are budded from bearing trees, will produce profit-paying crops in the earliest possible time.

J. H. HALE
Giant Size,
Enticing Flavor

**NATIONAL
J. H. HALE Reputation**
originated by the Late PEACH KING

MID-SEASON—Ripens 2 to 3 days before Elberta.

Original Strain J. H. HALE

There are many types and strains of J. H. Hale grown, but the only one worthy of commercial importance is the original strain, which is the extra large, round, highly colored Peach. The original strain necessitates cross-pollination and it is necessary, for proper results, to plant a few Belle of Georgia or Hiley along with Hale for cross-pollination.

Extra Large Size Yellow, freestone, extra large, beautiful red coloring, firm and of the highest quality and enticing flavor. J. H. Hale ripens about 2 or 3 days prior to Elberta.

WILLIAMS' EARLY RED

**The Big Red
Home or Market Apple**

Just at the time when people are
hungry for a fresh, new red Apple
this superb sort comes into market.
In New York, Boston, Philadelphia
and other eastern cities the fruit
sells about as quick as it hits the
market-house or dealer's store. It
holds its own anywhere and has
proven to be—

The Best Summer Apple

The rich bright red fruit catches
the buyer's eye and is ordered at a
price that yields the grower a good
profit. The Apple is large, with
tender, crisp, white flesh, juicy and
slightly tart. The trees come to
bearing when quite young, produc-
ing freely and steadily. Fine for a
filler or permanent tree, and being
hardy can be successfully grown in
New England states and Canada.
All orchards should include Williams
Early Red.

BETTER RESULTS Right From the Start with HARRISONS' HI-QUALITY APPLE TREES

LARGE TRANSPARENT (LODI)

A New Summer Variety

Ripens Very Early—Destined to Replace the
Ever Popular Yellow Transparent

We believe there is a big future for this new summer Apple. Our commercial friends should lose no time in anticipating the demand for an Apple of this type.

Somewhat of a dwarf grower, bearing very young, it makes an excellent filler. The skin is a clear yellow, white flesh, of medium size.

EARLY APPLE GROWERS MAKE MORE MONEY WITH LARGE TRANSPARENT

Yes, actual profits, that's what we mean. It can be done—here's why: Yellow Transparent Apples are always first on the market and generally bring good profits when they attain proper size. Size on Yellow Transparent is hard to get, but easily on its Big Brother, "Large Transparent," which ripens at the same time.

Large Transparent Apples Average Up to 1/2 Inch Larger Than Yellow Transparent

GRIMES GOLDEN

Harrisons' Selected "Big Yield" Strain
BEST HOME ORCHARD APPLE

Autumn, medium sized, golden yellow, tender rich, aromatic, sub-acid, delicious, possibly the best flavored Apple known, and a good keeper. No better variety exists for eating raw or for cooking. Tree is very hardy and one of the heaviest bearers known, producing extra large crops annually. Excellent variety for a filler, as it comes into bearing very early. Grimes Golden is the best pollenizer known, especially for Stayman Winesap, Turley, Baldwin, Cortland, Rome, Winesap, McIntosh and others. Be sure to include Grimes Golden in your orchard. IT IS EASY TO GROW.

9. Trustworthy

YELLOW DELICIOUS

It's Golden!

A golden yellow Apple with decided "Delicious" characteristics. Yellow Delicious has a remarkably good flavor, and is most popular for eating during the fall and winter months. Late September and January finds it at its best. Many people think it superior to the famous Delicious. Fall.

A Prolific Cropper at an Early Age

The Yellow Delicious Tree is very thrifty, hardy, and a vigorous grower. It is renowned for its heavy bearing of fruit at a very early age. You can depend on a good yield of ripened fruit each year.

DELICIOUS

SOMETIMES CALLED STARK DELICIOUS

This is the Original Strain of Delicious

Of peculiar and distinctive shape; brilliant dark red, flesh fine grained, juicy, crisp and melting; flavor sweet, with a slight acid taste, with a delightful aroma, very highest quality. Fall.

HARRISONS' "BUD SELECTION" FROM SUPERIOR STRAIN TREES

Young fruit trees, budded from selected trees in full fruit, are definitely superior to any other method of propagation. Careful examination and selection of healthy, heavily branched, heavy-yielding trees are without question the best parent trees to supply the buds for young tree inheritance.

OTHER FAMOUS APPLES

EARLY MCINTOSH. Resembles its McIntosh parent in appearance, but is less aromatic. An attractive uniform red color, good size, flesh white, tender, and juicy. The trees are vigorous, hardy, healthy, productive, and bear annually if thinned early and severely. The shape and framework of the tree, especially the heavy-butted branches, are like those of McIntosh. The crop ripens ten days later than that of Yellow Transparent. The fine flavor is similar to that of famous McIntosh Red.

DOUBLE RED BALDWIN. A new dress for this old reliable variety. Solid deep red color, much earlier than ordinary Baldwin. The color makes it sell better. This new strain will bring new profits to the grower of Baldwins. Late fall.

RED GRAVENSTEIN. This red sport is more attractive than Gravenstein. It differs from Gravenstein only in the solid dark red fruit. Late summer.

CORTLAND. A new variety resulting from cross pollenization of McIntosh Red and Ben Davis, and inheriting the good qualities of each parent. Beautiful red Apple, approximately the same size and fine flavor of the McIntosh, but ripens three weeks or a month later. Good keeper.

GALLIA BEAUTY. A Rome Beauty type of Apple identical in every respect, except its earlier coloring qualities; recommended for commercial planting. Harrisons' have the genuine original strain of Gallia Beauty.

SOLID RED WINESAP—Fine Flavored, Long Keeper

SCARLET RED STAYMAN

BRILLIANT COLOR

We offer to the public the greatest strain of Stayman Winesap ever discovered. It is a true bud sport found in a Stayman Winesap orchard. Scarlet Red Stayman takes on bright red color weeks earlier than ordinary Stayman. Its ripening date is the same but can be picked earlier if desired.

A Ready Market at Top Prices

Scarlet Red Stayman is the best general purpose Apple for planting in the East. Its solid scarlet-red color and its bright attractive finish causes it to command highest market prices. The fruit is large and it produces bumper crops each year.

SOLID RED WINESAP

Old Winesap generally has plenty of color when planted in most sections, but for those growers who want a more solid red-colored Winesap, we recommend our new strain.

**THE APPALACHIAN WINNER
RED YORKING**

(U. S. Plant Patent No. 125)

The Red Yorking is a "bud sport", being a mutation of the famous York Imperial. This "bud sport" originated on a tree, grown with other York Imperial trees, in Harrison's Nurseries and later sold to Mr. W. H. Allison, near Shipensburg, Penna., for use in planting a large orchard about 40 years ago.

BRIGHT RED JONATHAN—A Treat to Eat

SUPER RED McINTOSH—A Northern Favorite

RED SPY

A new "bud sport" from New England. Identical with the ordinary Northern Spy in fruiting habit. Extra large size fruit, strong, vigorous, hardy trees. Comes into bearing earlier than the ordinary strain. Colors early, nearly every Apple being solid red in color. We recommend it for commercial and home plantings in northern states.

RED ROME BEAUTY

An improved Rome Beauty, identical in vigor and production. Color of fruit much brighter and solid red. Produces much higher percentage of fancy apples and also superior in quality to the ordinary strain of Rome Beauty. Red Rome Beauty is renowned for bearing at a very early age, producing bumper crops of large size apples. The tree is a vigorous, strong grower, exceedingly hardy.

**GET YOUR
ORCHARD STARTED
THIS YEAR**

McINTOSH RED

**Improved Type—Heavy Yielding
Strain Preferred by Many
Growers in the North**

Until the discovery of our New Super Red McIntosh our improved McIntosh Red was the best strain of McIntosh available. It colors solid red when climatic and soil conditions allow it to remain on the trees until it is mature. This heavy yielding strain is much superior to any strain of McIntosh, especially the dull striped kinds. If you do not have trouble getting sufficient color then we recommend you planting this time-proven, heavy yielding strain. McIntosh Red is very hardy and produces bumper crops each year. Generally considered as the best flavored Apple grown. Recommended for home or commercial orchard plantings.

BRIGHT RED JONATHAN

We searched the country over to find a strain of Jonathan that had more color than our selected Big Yield Strain Jonathan. After thousands of miles of travel inspecting all of the new strains of this famous variety we found the one we had been looking for. It colors solid red several days earlier, otherwise it is identical with ordinary Jonathan. Growers who want more, deeper colored apples will find our Bright Red Jonathan the best colored strain obtainable.

SUPER RED McINTOSH

An improvement on our already famous strain of McIntosh Red. Color is brilliant solid red and commences to color weeks earlier.

**HARRISON BROTHERS
BERLIN, MARYLAND**

Harrisons' APPLE TREES for the APPLE INDUSTRY

Apple Growing Pays Profits

BUT in order to get these profits, it is necessary to start with the best trees and the most desirable varieties. Harrisons' Nurseries have been, and are still growing, at Berlin, Maryland, the finest and best apple trees of superior merits it is possible to produce. Harrison-grown apple trees are propagated on whole root stock, insuring an unusually large root system which is the basis of plant growth. Our apple trees are scientifically budded from selected heavy bearing strain trees of the variety desired, using the bud selection system. Today we believe that we have more of the improved and best strains of Apples in our nursery than any nursery concern in America. Do not allow a few cents per tree to keep you from buying Harrison-grown Apple trees, the finest and by far the best quality produced on the North American Continent.

TRUE TO NAME

The World's Foremost Fruit Variety Identification Specialists Have Examined Harrison-Grown Trees and Pronounced Them True to Name. In addition to carefully selecting the propagating wood from bearing trees of superior strains, we have also employed the services of Dr. A. P. French, Dr. O. C. Roberts and Dr. L. Southwick, Professors of Pomology of Massachusetts State College, Amherst, Mass. These men are the world's foremost fruit identification specialists and they have pronounced our trees true to name.

Little Orchards Make More Profit Than Big Farms

TODAY FRUIT GROWING is gaining on the big farms—little orchards lead the way to a profitable year-round fruit market.

One of the Famous Harrisons' Apple Orchards in Bloom

RESULTS COME SEVERAL YEARS HENCE

No one can measure in advance the future results of a newly planted orchard. A few years must come and go before the trees bear fruit. A good inheritance immediately qualifies it as a money-maker, fruit is large and true-to-name. Poor trees at any price never give satisfaction.

Sixty-two years of dependability and square business dealings finds Harrisons' today the best place in America to buy truly dependable trees.

Millions of Harrisons' bud selected fruit trees planted throughout the years are today the very backbone of a profitable and dependable fruit business in all sections of the country.

HARRISONS' TREES HAVE A GOOD RESERVE OF PLANT FOOD

Harrisons' trees are scientifically nurtured so that the trees will absorb the different latent plant growth elements so vitally necessary in the successful growth of trees after transplanting. This stored-up energy is one of the many reasons why Harrisons' trees prove successful wherever planted.

HARRISONS' HARDY APPLE TREES

We absolutely guarantee Harrison-grown apple trees, variety for variety, to be as hardy or harder than trees grown in any locality north of us.

Harrisons' Super-Selected Trees

with their unusual substantial root system, are proving again and again that "bud selected" strains spell yearly profits to orchardists and commercial planters.

Harrisons' Bud Selected Apple Trees Bear Fruit Quick

A NATIONAL SCARCITY OF FRUIT TREES

There is a drastic shortage of fruit trees throughout the nurseries of the United States; as a matter of fact, the smallest supply available for 1946 orchard plantings that there has been at any time during the past fifty years.

A recent national survey shows that fruit trees will even be more scarce during the next two years than now. Play safe—act quick—place your order now while trees are available.

Yellow Transparent

It's a Summer Apple—First of the Year

Ripens Early, Skin Clear Yellow, Flesh White, Flavor Slightly Acid, Size Medium

This is the most popular early green apple grown and has proven a profit maker in a large number of apple districts. The Yellow Transparent tree is very hardy and somewhat of a dwarf grower, bears when very young and makes an excellent filler. We believe there is a big future for the grower who plants this variety; we ourselves anticipate planting several hundred trees of Yellow Transparent this year.

Yellow Transparent First On the Market

As it ripens early in July, making excellent eating apples and selling without difficulty. There is almost no competition at this time; Yellow Transparent leads the field, and is eagerly sought for by those people who find their "apple appetites" impatient.

OTHER SUMMER APPLES

EARLY RED DUCHESS. Highly colored early apples bring premium prices. This bud sport colors red all over early in the season.

STARR. Large, attractive with bright yellowish smooth skin; sometimes marked with a faint blush and numerous russet dots; flesh yellow, fine, very tender, crisp, juicy, aromatic and of extra fine quality, bringing highest prices. Recommended to those with nearby markets, but a poor long distance shipper. Popular in Southern New Jersey.

RED SUMMER RAMBO. Harrisons' new early coloring bud sport. This new strain is much superior to the ordinary Summer Rambo.

WEALTHY. Medium to large size; round, almost solid red; flesh white or a little stained; tender, crisp, juicy, fine grained, aromatic and very good flavor. Relatively good keeper. Old variety most extensively planted in North. Tree is very hardy, withstanding unusually cold climates, vigorous, fruits at early age, bears regular and abundant crops. Tree somewhat dwarf, making a fine filler.

GOOD FALL AND WINTER APPLES

BALDWIN. Large, red, yields big crops, good keeper. Winter.

CHERRY RED STAYMAN. Many growers, especially in certain districts, have some trouble getting enough color on their Stayman Winesap. We offer Cherry Red Stayman to those growers who want more and darker color. This strain is lighter in color than Dark Red Stayman, but darker in color than Scarlet Red Stayman, otherwise its characteristics are the same as ordinary Stayman in fruiting, etc.

DARK RED STAYMAN. The darkest of all our Stayman Winesap strains. It is especially recommended for growers who want the dark or almost black-colored apples. It is a heavy yielder, but we prefer any of the other strains that we offer to this one.

JONATHAN. Medium to large, red, juicy. Good keeper and an excellent shipper.

LOWRY. Beautiful mahogany-red, good, medium size, round oval shape, nearly sweet, mild sub-acid; excellent flavor, good shipper, long keeper, and sells at fancy prices in export as well as domestic markets. New popular commercial variety in Virginia.

MAMMOTH BLACK TWIG (Paragon). Extra large in size and round; skin smooth, yellowish covered with deep red, the general effect being dark red; flesh tender, tinged with yellow, crisp, sub-acid, aromatic, fine flavor, of excellent quality, long keeper of great value. An important commercial variety in the East. Tree is vigorous and healthy, yields big crops. Plant Delicious or Jonathan as a pollinizer.

NORTHERN SPY. Large, bright scarlet-red, with yellow markings. Flesh juicy, rich, crisp, tender, aromatic and highly flavored. Tree a strong erect grower, very healthy, extremely hardy and a free producer. We offer an exceptionally heavy bearing strain that comes into bearing at an early age.

NORTHWESTERN GREENING. Large, round, greenish yellow; juicy, firm, good quality; splendid keeper, ships well. Attractive apple when packed in bushels, demands good prices, excellent baking apple. Should not be planted extensively, because crops are not so certain, due to blossoming early. Trees are extremely hardy, vigorous, and bear very young.

RHODE ISLAND GREENING. The Popular Northern Apple. Large, greenish yellow; flesh crisp, juicy, quite acid, firm, fine grained, tender, and of very fine flavor and quality. An excellent keeper, a popular barrel apple, brings good prices. Generally planted in New England, New York, Michigan and Canada, but not advisable to plant south of the Mason-Dixon line.

ROME BEAUTY. Large, round, red, flavor and quality above average.

STAYMAN WINESAP Big Yield Strain.

Without a doubt the heaviest yielding strain of Stayman Winesap obtainable. This strain yields bumper crops year after year. It colors to a good bright red and gets nearly solid red colored when allowed to stay on trees until fully ripe. This is an improved strain and is preferred by many growers in the East. Tested and time-proven by thousands of growers.

SMOKEHOUSE. Large apples of superfine flavor, excellent for eating, yellowish green mottled with dull red and with many russet dots; flesh firm, crisp, juicy and aromatic. Tree large, vigorous and reliably productive.

WINESAP An Apple Favorite in Virginia.

Sometimes called Old Winesap and Virginia Winesap. Medium size, oblong, smooth, and a fine dark red—one of the best red colored apples grown; flesh yellow, crisp, tender, very juicy, aromatic, firm and of excellent flavor. Very long keeper and considered the best cold storage variety, keeping until July. Strong grower; comes into bearing early. Our strain produces bumper crops of the larger sized apples with plenty of color.

YORK IMPERIAL. Medium to large size, round, irregular, greenish yellow overlaid with bright red; flesh tender, firm, crisp, and of high flavor; wonderful keeper. Can be kept in cold storage until June. Tree is a vigorous grower, strong and healthy; an unusually heavy bearer.

CRAB APPLES

Priced on pages 4 and 14.

Dual Purpose—An Ornamental and Fruit Tree Combined

HYSLOP. Deep crimson, large size, sub-acid and of good quality. Fine for all kinds of preserving, canning, etc., and good to eat fresh. Tree handsome.

TRANSCENDENT. Yellow striped with red; good for eating fresh and fine for preserving. Best of all crab apples. Tree large; quick grower.

- 5—Bear Early
- 6—A Harrison Brothers Specialty

BARTLETT

For home or commercial use, the Bartlett Pear is the best. A good specimen of this variety is shown in the illustration. The fruit is large, pear-shaped, and yellowish white, with a greenish yellow blush on the cheek. The flesh is white, juicy, and tender. The tree is a heavy cropper and bears early. It is very subject to damage by insects and birds, and should be protected with netting.

BARTLETT PEAR
So Full of Juice
You Can Eat
Them With
a Spoon

Fancy Bartletts Bring Highest Prices

The fruit is packed in the same way that you pack your own. The pears are sometimes packed in peach carriers, and sell to good advantage. Plain fruit, without wrapping, in small baskets or boxes.

One or two Bartlett Pear trees in the city yard will furnish a considerable amount of fruit. A half dozen will supply the family with fresh fruit and a surplus for preserving.

PLANT BIG TREES for QUICKEST and BEST RESULTS

HARRISONS' FAMOUS PEAR VARIETIES

BEURRE BOSCH. Large, yellow, with a greenish yellow blush. Highest market price. Late.

BEURRE D'ANJOU. Large, yellow, with a greenish yellow blush. What yellow when ripe. Vinous, good flavor. Tree vigorous, late bearer. Very late.

CLAPP'S FAVORITE. Large, yellow, with a greenish yellow blush. Productive. Thrives well. Very early.

DOUGLAS. Very resistant to blight. Wonderful quality, good flavor. Blush on the cheek. Bears early.

DUCHESSE. Very large, dull greenish yellow. Tree somewhat dwarf but a dependable bearer. Late.

GORHAM. Flavor is sweet and vinous with a marked and pleasing aroma. Flesh is tender, buttery and juicy. Valuable for dessert and canning. New.

KOONCE. One of the best. Resistant to blight, does not rot. Pears. Fruit is yellow, with a greenish yellow blush. Very early.

SECKEL. A beautiful and productive variety. Tree dwarf, bears early.

WORDEN SECKEL. A beautiful and productive variety. Tree dwarf, bears early.

KIEFFER

SURE CROPPER
EASY TO GROW

Pear in Canada. Kieffer is blight-resistant, and successfully planted in large orchards.

This fruit is large to very large size; skin yellow, with vermilion cheek; flesh yellowish white, very juicy, for being a long time keeper. Most popular canner.

A leading commercial variety. New method of storing allows Kieffer Pears to have as good flavor as other varieties.

HARRISON'S *famous* PLUMS

AMERICA'S BEST VARIETIES NEW LOW PRICES

ABUNDANCE. Early, large, color pinkish red changing to darker red, with thin bloom. Yellow flesh. Very juicy, sweet and tender, pleasantly aromatic. Hardy, very productive. Adaptable to a wide diversity of soils and climates.

BRADSHAW. Mid-season, large, dark violet-red, juicy, excellent flavor. Desirable for canning.

BURBANK. Early, about one week after Abundance. Large, cherry-red with thin lilac bloom. Flesh amber-yellow with rich, sugary flavor; high quality and very productive. A product of Burbank, the master plant breeder. Should be in every orchard.

FELLENBERG PRUNE. (Italian.) Late, medium size, freestone, dark purple, delicious. Fine for drying.

GRAND DUKE. Late. Commercial variety, purplish black, juicy, sweet, excellent for cooking.

GERMAN PRUNE. Late, large, dark purple, sweet. Good for canning and drying.

LOMBARD. Mid-season. Medium size, showy purplish red fruit, excellent quality for canning, cooking, preserving or spicing. Prolific cropper.

RED JUNE. Early, medium size, garnet-red color, thin bloom, flesh light yellow, somewhat meaty, sweet, aromatic. Trees are healthy, hardy and productive. An early market Plum.

SANTA ROSA. Early. Fruit very large size, round, purplish red, flesh reddish near skin, firm, juicy, and has a pleasant tart flavor, of exceptionally high quality.

SHROPSHIRE DAMSON. Late, medium size, dark purple. Very productive. The best for preserving. The popular old-fashioned Damson variety.

STANLEY PRUNE. Mid-season. Freestone, large, new prune variety, outstanding characteristics. Considered best for cooking and fresh fruits.

WICKSON. Mid-season. Extra large size, color dark red, thin bloom, flesh amber-yellow, firm, sweet.

Extra Good Fruits for the Home Garden APRICOTS

The Apricot is one of the most delightful luscious fruits grown, when eaten fully ripe and fresh from the tree. It is remarkable that such a rich and beautiful, golden, sweet fruit is not planted more, especially since it ripens just after the early Cherries and before the best early Peaches.

ALEXANDER. Early, prolific, freestone, orange, with red blush; very juicy and sweet flavor. A large prolific sort that will withstand adverse weather conditions. This variety deserves greater popularity. The best.

EARLY GOLDEN. Pale orange, juicy and sweet. Is a hardy, prolific bearer; ripens first of July.

ASPARAGUS

*It's Easy
with*

Harrisons' "Big Yield Strain"

MARY WASHINGTON

Highly Profitable and Easily Grown

Being the first vegetable to come in the spring it always brings a high price on the markets. Stalks being delicious and very healthful, every garden should have a generous supply and when properly set and cared for will last a lifetime.

The Famous True-to-Name Mary Washington

Plant This Pedigreed Strain

There is no variety of asparagus as good as Mary Washington and whether you are growing for home use only or for market you cannot afford to grow any other. This wonderful new asparagus was developed and introduced by the U. S. Department of Agriculture and although it is just a recent introduction it has become famous the country over.

Rust Resistant—Profitable

Growers everywhere are discarding all other varieties in favor of the famous Mary Washington, because it is earlier, the stalks are larger, more tender and more productive than any other variety and more highly immune to rust, which means that one planting will produce profitable crops for many years.

Large—Early—Tender—Juicy

Asparagus buyers now demand Mary Washington and are willing to pay fancy prices to get it. The demand for Mary Washington is tremendous because when it is once eaten, no other variety will give satisfaction. The stalks are purplish green color, large, tender and juicy. A very rapid grower, which means many cuttings.

Prices of Genuine Pedigreed Mary Washington Asparagus Roots

	25 Roots	50 Roots	100 Roots	250 Roots	500 Roots	750 Roots	1000 Roots

1-yr. No. 1	2.25	3.75	6.00	12.00	18.75	24.75	30.00

New Gigantic Red MacDonald Rhubarb

If you want something different, something delicious in garden fruits, then plant some of this grand new MacDonald Rhubarb.

Stalks are of giant size on mature plants, and a rich rosy red in color. This beautiful color carries through the stalk. Sauce made from it has the red color of a dish of Strawberries. Flavor is mild and pleasing. This new Rhubarb does **not** send up seed stalks and never becomes tough or stringy. Just cut in small chunks and cook. Do **not** remove the tender skin; it cooks right up with the stalk.

Heavy plants: \$1.00 each; 6 for \$5.40.

SAVE A YEAR! PLANT JUMBO THREE-YEAR

Mary Washington Asparagus Roots

Yes, you can grow your own delicious tender Asparagus quick by planting our jumbo size roots. These roots are the cream of our three-year-old crop and have already borne large, early, tender, juicy Asparagus in the nursery. This is the selected pedigreed Mary Washington strain and is far superior to other kinds.

HARRISONS' BIG YIELD STRAWBERRY PLANTS

Dependable
Hardy
True-to-Name

Harrisons' Selected Strain "Big Yield" Strawberry Plants Are Better

1. Thirty years experience in growing, propagating and handling strawberries.
2. Every plant propagated by Harrisons is the offspring of a selected plant that is showing outstanding vigor and productiveness.
3. Absolutely free from diseases and insects.
4. Grown on specially nurtured high ground soil.
5. Our method of digging enables us to get all the roots.
6. Clean, graded and packed in modern packing crates.
7. Absolutely true to name.
8. Prompt service.
9. Better plants for less money.

BLAKEMORE

Big Strawberry has become so popular so quickly as Blakemore. It is the most popular variety in all America. Ripens several days before Premier and is equally dependable for a good crop every year. The plant is healthy and stands up well during drought. The berries are large, firm, an attractive red and good quality. Fine for canning and preserving because it holds its color and shape so well.

DORSETT, Early

Large Fruit—Vigorous Grower—Heavy Crops

Dorsett berries average large size, considerably larger than the Premier. In fact, their size is comparable with Chesapeake, which is the outstanding late berry. Plant growth is exceedingly vigorous, bearing far more vigorous than most other varieties. Dorsett yields large crops of fancy, light red berries.

FAIRFAX, Early

The Sugar-Saving Berry

Color is a deep, full red; its rich, sweet flavor brings buyers back for more. Fairfax berries are exceptionally firm, making it an ideal shipper. Superior to all for home use, equal to any for commercial planting.

Long, Fibrous Roots

With proper soil conditions in the development of a long, fibrous, heavy root system, our customers may be assured of the kind of plants that will be readily established in a new location. It's the Harrisons' Super-Selected strains that bring you bumper crops.

PREMIER King of the Early Berries

Too well known to need much description. The standard early berry by which all other varieties are judged. Holds all records for big crops and big profits. Premier has filled more crates, made more dollars and brought joy to more strawberry growers than any other variety ever grown.

Adapted to All Soils—Heavy Yields. It thrives on most any type of soil and is a rampant plant maker. Premier fruits extra early when berries are selling at a high price. It is a big yielder of big, bright red berries of fine flavor. For home garden, local markets, or for shipping moderate distances it has outclassed all the other varieties.

BIG JOE The Old Reliable Mid-Season Variety

LARGE YIELD—FANCY FRUIT—FINE FLAVOR

Big Joe is a heavy producer of large, brilliant red berries of extra fine flavor and is firm enough to withstand long shipments. The plants are good growers and heavy yielders. This variety succeeds on all types of soil but does extra well when given good care and fertility. Be sure to include some Big Joe in your planting this spring. Our "Big Yield" strain insures big crops.

CATSKILL Mid-Season

A mid-season berry that will produce the largest crop of bigger berries of any mid-season variety we know. Catskill is entirely satisfactory as to firmness, quality, even and attractiveness, season of ripening and climatic adaption. The highest record of marketable berries was made with this variety. In shipping respects it ranks with Chesapeake and is equally as attractive as Fairfax or Dorsett. The berries are borne on rather long trailing stems which makes it easier to get at in picking.

CHESAPEAKE The Favorite Late Berry

It is a good producer of very large berries that hold their shape well until the end of the season. It does not yield as many berries per acre as some of the early varieties, but the size and quality of its fruit enables it to sell for a much better price which offsets this disadvantage. The berries are firm enough to ship to distant markets and to arrive in first-class condition. An exceedingly valuable commercial berry but equally adapted for home planting. We offer a selected "Big Yield" strain.

Harrison Strawberry Plants Are Bred Up for Bigger Yields and Tell the Story at Harvest Time.

Four Undisputed Strawberry Leaders

PICK WORLD'S FINEST BERRIES FROM YOUR OWN PLANTS

A BIG PROFIT FROM YOUR OWN BACK YARD

Everybody prefers the flavor of vine-ripened Strawberries. They are more delicious and usually sell for 10c to 20c more per quart. Customers pay premium prices for garden fresh Strawberries and small growers make real money, up to \$500.00 per acre.

Whether you have a small garden or several acres, you can make a big extra cash income by planting Harrison's "Big Yield" Strawberries. Others are doing it, why not you? It costs only a few dollars to get started.

VICTORY GARDEN OFFER No. 21

25 BIG JOE	25 PREMIER
25 FAIRFAX	25 CHESAPEAKE
ALL FOR \$3.75	

HERE'S A NEW ONE Extra Good—Very Late **RED STAR**

This is the other new one by the U.S.D.A., and a cross between the Chesapeake and Fairfax. This is the late one. Berries are large, and are borne on short stout stems that stay well under the leaves, thus protecting them from late frosts. Makes a good fruiting row, and plenty of money can be made from growing this one, as late berries always bring a high price.

Gem

Harrison's' Everbearing MASTODON

A TRIPLE YIELD

1. Plant this spring, 1946.
2. Pick 1st crop, July to frost, 1946.
3. Pick 2nd crop, June, 1947.
4. Pick 3rd crop, August to frost, 1947.

3 REAL CROPS—3 BIG PROFITS

Bears in 90 Days, and, too, It's the Best
Family Garden Strawberry
Loads of Big Berries in 90 Days

Unlike the other varieties, Mastodon begins to bear luscious berries 3 months after planting and bears 3 big crops in 18 months. Customers have reported yields as high as 3 quarts per plant the first fall.

Why Wait a Whole Year?

Plant Harrison's "Big Yield" Mastodon this spring, and grow your own berries this summer and fall, instead of buying them. If you have more than you can use, they are easily disposed of in the nearby community, where they will always bring top prices.

GEM EVERBEARING

New Companion for Mastodon

Get Your Berry Patch Started This Season

Gem will start to bear the first season planted and will bear large crops until frost. These berries bring the highest prices in the markets or on a roadside stand. There is a great opportunity for making money by planting Gem. Get your patch started this season; they will give you enough berries for your own family and some to sell to your neighbors or ship to the city markets.

New the Sensational Boysenberry

HARRISON BROTHERS
BERLIN,
MARYLAND

The New Mammoth Berry That Will Revolutionize the Berry-Growing Industry

Two Inches In Length

The new Boysenberry is truly a giant Youngberry. We offer it again and again because of the tremendous large size of the berries; because of their prolific nature; and lastly because we think that it has the highest quality of all berry fruits.

They are just as easy to grow as Blackberries. They produce a larger crop and contain more berries, but because each berry is so much larger, it has a rich, tangy flavor all its own.

No. 1 plants: 3 for \$1.35; 6 for \$2.40; 12 for \$3.50; 25 for \$5.50; 50 for \$9.50; 100 for \$16.50; 250 for \$35.00.

ELDORADO Blackberry

A Heavy Yielding Blackberry that Spells Success Everywhere

Blackberries Every good quality possessed by other Blackberries is emphasized in Eldorado. Its berries are of enormous size, shiny jet-black sweet tangy flavor.

For Home or Commercial Planting. It is valuable for all purposes, both home and commercial, being so firm that it will remain in good condition for three and four days in the market where it always commands the highest price. This variety is making big money for other growers and it will do the same for you.

PRICES OF BLACKBERRIES: Selected plants, 1-yr. No. 1 grade, 6 for \$1.70; 12 for \$2.45; 25 for \$3.85; 50 for \$6.65; 100 for \$11.55; 250 for \$25.00.

The Heavy Yielding Variety. The heavy producing quality of Eldorado has placed it first among

BOYSENBERRIES—
A Real Treat,
Easy to Grow

LUCRETIA DEWBERRY

Long, mammoth black berries, recognized as the leading variety, incomparably better in every way than any Blackberry you have ever seen or tasted. Lucretia is a very early bearer, ripening from a week to ten days before even the earliest Blackberries. Big uniform size makes them top notchers in price on any market. For real profits and for home and commercial growing, Lucretia is the only variety of importance.

No. 1 plants: 6 for \$1.20; 12 for \$1.75; 25 for \$2.75; 50 for \$4.75; 100 for \$8.25; 250 for \$17.80.

GOOSEBERRIES

RED JACKET. Big, roundish oblong berries with a mild, sweet flavor. Delicious for fancy desserts, salads, preserves, pies, etc. Bushes lovely as shrubs. Small yellow bloom.

DOWNING (Green). Large greenish yellow variety favored for shipping and canning. Highly flavored.

Large 1-yr. bushes, \$1.00 each; 3 for \$2.85; 6 for \$5.40; 10 for \$8.00.

CURRANTS

NEW RED LAKE. Biggest, sweetest, most productive Currant on the market. Large bunches, extra hard.

WILDER. One of the strongest growers and most productive. Bunch and berry large, bright, attractive.

Large 1-yr. bushes, \$1.00 each; 3 for \$2.85; 6 for \$5.40; 10 for \$8.00.

Grow Finer Flavored Berries

With Harrison's' ^{SELECT} ^{CERTIFIED} Raspberry Plants

LATHAM

WORLD'S LEADING RASPBERRY

The sensational yields of this variety have attracted the attention of growers everywhere, and all those who have given it a trial are praising the many unusual features they have found in Latham. After thoroughly testing Latham we find it a remarkable variety in every respect; you will be both delighted and surprised after giving it a trial.

Tremendously Productive; Large Berries. Latham is a tall, vigorous grower, the canes are extra heavy, well able to support the load of fruit. The foliage is healthy, dark green, tough and leathery, highly resistant to insects. Latham ripens with Cuthbert. Covers a longer fruiting season. The berries are beauties and will cause a sensation wherever they are shown. Many are over an inch in diameter and they hold this size to the end of the season. Color dark rich red.

A Blue Ribbon Winner for the Home and Commercial Grower. It simply cannot be equalled.

OTHER RED RASPBERRIES

CHIEF. A new Red Raspberry that is destined to challenge the supremacy of Latham, originated by the Minnesota State Breeding Farm and has been given rigid tests over a wide area. It has proven hardy, resistant to disease, a heavy cropper of large, excellent quality berries that will withstand shipments to market.

ST. REGIS. There is a demand for this fine fruit in the late summer and fall. Growers make exceptionally large profits when grown for markets. However, if you do not grow them for market, by all means plant a few bushes for home use. St. Regis produces a big crop of fruit during the regular season and then continues bearing all summer and fall on the new canes.

The Most Popular Black Raspberry

CUMBERLAND RASPBERRIES—The Best Black

LATHAM—The Big Red Raspberry Pictured in color on front cover.

HARRISONS' HARDY RASPBERRY PLANTS

We absolutely guarantee Harrison's' Raspberry plants to be as hardy, or hardier, variety for variety, as Raspberry plants grown in any locality north of us.

CUMBERLAND

Mid-season to late. This is the most popular Black-cap of the present time, because of its great size, firmness, and productiveness. The fruit is the largest of the Raspberry family, and is of such handsome appearance that it is sure to bring the top prices on the market.

A BIG CROP EVERY YEAR

Cumberland has never been known to fail to produce a big crop every year. This variety is perfectly hardy and tremendously productive, the bushes are vigorous, upright and healthy. Berries are glossy black in color, not equalled by any other variety in quality, flavor and appearance. It's good to eat and good to sell.

PLANT ONLY DISEASE-FREE PLANTS

A good patch of Black Raspberries yields big profits, but in order to get profitable yields it is absolutely necessary to set only vigorous, disease-free plants. Harrison's' selected-certified Black Raspberries are the best plants to be had. Under ordinary conditions they will yield from 1500 to 3000 quarts per acre, whereas weak or run-down diseased plantings only yield around 400 to 800 quarts per acre. The best plants are cheapest in the long run.

NEW LOGAN. A new Black Raspberry variety; probably its two most noteworthy characteristics are that it ripens about a week earlier and is more resistant to the virus diseases. A very productive variety and fruit of good size and quality. If an early berry is desired, it is one of the best. It does not crumble.

NEW GIANT Cultivated Blueberries

- Profitable to Grow
- Delicious Berries
- Very Ornamental

Once Planted Lasts a Lifetime

Blueberries are not only the largest money makers of all time commercially, but are also one of the easiest fruits to grow. The berries bring up to 75c per quart—\$400.00 per acre the third year. They are exquisitely mild, sweet and delicious and bring highest prices on the market. The demand for Blueberries is practically unlimited. A planting lasts a lifetime with proper care and the plants will pay for themselves their first crop. A few bushes planted in the shrub border and in the garden will be sufficient to supply you with berries for years.

BLUEBERRIES—Ornamental as Well as Fruitful
Jumbo Size—Bear First Year Planted

Blueberries—Easy to Grow

Set the bushes 5 by 7 feet apart in moist, acid soil. If your soil is sweet, it may be made acid by mixing with it a little quantity of acid peat, rotted leaves and pine needles, or similar material. Fruit ripens over a period of several weeks. Plant two or more varieties so as to insure proper pollenization.

Very Ornamental

As an ornamental shrub the Blueberry cannot be surpassed. Full of lovely pink blooms, which open to bell-shaped, white flowers in June. Plants are compact, low growing, having waxy green leaves which turn red during the fall. Twigs are reddish brown and very showy during the winter.

SPECIAL JUMBO SIZE BLUEBERRY PLANTS

Have already fruited in the nursery. Ready to bear big crops of luscious berries on your own grounds and are as easily grown as a shrub or rose bush. You can pick delicious berries the first season planted, and each year they will produce a larger crop with very little attention. We only have a few hundred of these Jumbo sized plants to offer. Can supply in the following varieties only: Cabot, Rancocas, Concord, Rubel, and Jersey.

Prices: Jumbo size, 4-year-old, 2 to 3 ft., \$4.25 each; 3 for \$12.00; 10 for \$37.50.

1946 PRICES OF ALL BLUEBERRIES

3-yr., 18 to 24 inches	2.75	2.35	2.00	1.75	1.50

FIVE LEADING BLUEBERRIES Listed in Order of Ripening

CABOT. Plants seldom exceed three feet in height and make a broad, low bush. The color of the new growth in winter is a light red over olive. The large berries have a delicious sub-acid flavor.

RANCOCAS. The bush of slender, vigorous, upright habit rarely surpasses five feet in height. The winter twigs are a dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days earlier.

CONCORD. The bush is of upright habit and at maturity exceeds six feet in height. The young growth is bright red in winter. The berries are large, frequently reaching three-quarters of an inch in diameter. They usually ripen a few days earlier than Rubel and are fine in flavor and appearance.

RUBEL. A vigorous, productive variety. Well developed bushes stand six feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July. Best commercial variety.

JERSEY. The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden brown. The berries are the largest of any here listed, light blue, and ripen about the same time as Rubel.

Lifetime Shrubs To Beautify Your Home

Make Your Garden a
Show Place with
Harrison's Hi-Quality
Ornamental Shrubs

TARTARIAN HONEYSUCKLE

HYDRANGEA P. G.

CREPE MYRTLE (*Lagerstroemia indica*). Small green leaves; very beautiful, showy flowers during mid-summer to fall. Most desirable shrub in any landscape. Not hardy north of Mason-Dixon line, but most popular southern shrub. Pink and red varieties. **1½ to 2 ft., each \$1.50.**

FIRETHORN. A beautiful shrub covered with a profusion of white flowers in early spring, followed by bright orange berries which hang on all winter. **1½ to 2 ft., \$2.50 each.**

HYDRANGEA PEE GEE (*Hydrangea paniculata grandiflora*). Large flowers: first snowy white, then pink changing to reddish bronze in the fall. Blooms mid-summer to fall. **18 to 24 inches, 90c each.**

QUINCE, FLOWERING (*Cydonia japonica*). Scarlet flowers in April and May. No doubt one of the most attractive spring blooming shrubs. **1 to 1½ feet, \$1.00 each.**

SPIREA ANTHONY WATERER. Crimson flowers in large, flat clusters. Blooms early and continues till fall. **15 to 18 inches, \$1.00 each.**

WEIGELA EVA RATHKE. Very attractive deep carmine-red flowers, making a very showy shrub. **1½ to 2 feet, \$1.00 each. 2 to 3 feet, \$1.25 each.**

BEAUTY BUSH. Pink tubular flowers, heavy bloomer, hardy **2 to 3 feet, \$1.25 each.**

The Glorious Spirea Van Houttei

This grand shrub has done more to beautify the homes of America than any other variety. It is valuable as a specimen in groups, in border planting, and for hedges. The branches are winter-dressing covered with white flowers in April or early May. It grows in any place either in full sunlight or partial shade. Disease resistant, hardy, thrives under adverse conditions. Unusually tall 6 to 8 feet but can be kept lower by trimming. The most popular shrub. We have an extra fine supply of first class plants this year and are pricing them especially low.

ALTHEA or ROSE OF SHARON (*Hibiscus syriacus*). True double and single flowers. Large, showy, in various colors. One of the most popular shrubs in the garden.

BUDDLEIA MAGNIFICA. A shrub of great beauty, with long, narrow, lanceolate leaves, and clusters of small, tubular flowers. Flowers are pink, purple, or white. Foliage is heavy, rich dark green, very hardy.

DEUTZIA, PRIDE OF ROCHESTER. Double white flowers, slightly tinged with rose appear in late June.

DOGWOOD, RED-BRANCHED (*Cornus sibirica*). Bright red bark, white flowers, and bright red berries in winter.

GOLDEN BELL. A shrub of great beauty, with long, narrow, lanceolate leaves, and clusters of small, tubular flowers. Flowers are yellow, white, or pink. One of the most popular shrubs in the garden.

HONEYSUCKLE BUSH. A shrub of great beauty, with long, narrow, lanceolate leaves, and clusters of small, tubular flowers. Flowers are white, pink, or red.

SPIRAEA BILLIARDI. A shrub of great beauty, with long, narrow, lanceolate leaves, and clusters of small, tubular flowers. Flowers are white, pink, or red.

SYRINGA, SWEET MOCK ORANGE or GARLAND (*Philadelphus coronarius*). Of upright habit, and produces a wealth of white, fragrant flowers.

SWEET-SCENTED SHRUB (*Calycanthus floridus*). Hardy, native, with many double, chocolate-colored flowers. Most fragrant shrub in the world, and a spray fragrance.

TAMARIX, AFRICAN (*Tamarix africana*). Feathery gray-green foliage, very showy.

TARTARIAN HONEYSUCKLE. A shrub of great beauty, with long, narrow, lanceolate leaves, and clusters of small, tubular flowers. Flowers are white, pink, or red.

WEIGELA, PINK (*Weigela florida*). The most beautiful of the Weigela family. Its delicate, pink, bell-shaped flowers are borne in large, drooping, branching clusters.

FIRETHORN—Orange Berries All Winter

Harrison's Shrubs Add Color and Variety to Your Planting

GORGEOUS LILACS

Lilacs are marvels of beauty and elegance. They are one of the first plants to bloom in the spring. Perfectly hardy in any locality. We can supply the following colors: White, Purple, Pink and Blue. State color desired. Prices: Field-grown plants, \$1.50 each; 10 for \$13.00.

3 to 4 feet	1.00	2.85

RED-LEAVED BARBERRY

(*Berberis thunbergii atropurpurea*)

A highly important introduction among shrubs, giving us for the first time a practical, easily grown shrub of medium height, with good, distinctly red foliage. This must prove a boon to all types of landscaping, where studied contrasts are to be worked out with the shrub foliage depended on for colors. Red berries during winter 18 to 24 inch, \$1.00 each; 3 for \$2.70.

ROYAL BLUE HYDRANGEA

ROYAL BLUE HYDRANGEA

(*Hydrangea Otaksa*)

Old favorite southern Hydrangea. When winters are severe we suggest heeling in. Large balls of blue flowers; very attractive large leaves. Color depends on acidity of soil. Field grown plants, \$1.50 each; 2 for \$2.80.

When You Think of Your Shade Trees, Buy Direct

NORTHERN STRAIN

CHINESE ELM

Grows 20 Feet in Four Years

Because of its beauty and extremely rapid growth, Chinese Elm has become a leading shade tree of America. It is planted in every state, and like its native country of Korea, withstands intense cold and extreme heat. It makes excellent shade in five short years, averaging about 5 feet growth annually. It is by far the fastest growing hard-wooded shade tree. It resembles the American Elm except the leaves are smaller, with the gracefulness of a Cut-Leaf Birch. **Prices: 6 to 8 ft., \$2.25 each. 8 to 10 ft., \$3.00 each.**

ORIENTAL PLANE

(*Platanus orientalis*)

A rapid, upright, clean growing shade tree, long lived, beautiful dense foliage. A superb tree of gigantic proportions, which is very hardy. The Oriental Plane, being originally an imported tree during the past generation, has rapidly won high popularity in recent years due to its many merits which have made it the most useful and the most sought for shade tree for lawns, parks, streets and highway plantings. Harrison's Nurseries are specializing in growing Oriental Planes and we are the largest growers in America. **Prices: 6 to 8 ft., \$3.00 each. 8 to 10 ft., \$4.00 each. 10 to 12 ft., \$5.50 each. 12 to 14 ft., \$8.00 each.**

SILVER MAPLE

(*Acer dasycarpum*)

The name comes from the color of leaves. Underneath these are the same shade as new, bright silver; on top they are light green. Many of them are carried on their edges, and when wind blows the trees are alive with silver and green flashes. In the fall the leaves fade to pale yellow. Growth is faster than that of any other Maple, and probably faster than that of any other shade tree. Branches are slim and dainty rather than heavy, and the form of growth is spreading. Gets very large eventually—as high as 120 feet sometimes—and does well over nearly all the United States. Makes splendid quick screens or quick shade. On streets and in parks is extensively planted, and is very fine. **Prices: 6 to 8 ft., \$2.25 each. 8 to 10 ft., \$3.00 each.**

ORIENTAL PLANE
The Famous Light Bark Tree

SILVER MAPLE

Plant Paper Shell PECAN TREES for Shade and Nuts

PAPER SHELL PECAN

Medium to large nuts; oblong thin shell rich flavor. Good grower. The best type pecan grown. **2 to 3 ft., \$3.00 each. 3 to 4 ft., \$4.00 each.**

BLACK WALNUT

(*Juglans nigra*)

Rapid grower, spreading branches, large delicious nuts, prolific bearer. **2 to 3 ft., \$2.00 each.**

PECANS—Abundant Nuts in Winter

AMERICAN PERSIMMON

Small trees highly ornamental and producing an abundance of pleasingly astringent spicy fruits, highly prized when gathered after the frosts. **2 to 3 feet, \$2.00 each.**

FIGS

To Tempt the Appetite

BROWN TURKEY. Medium to large size; copper-brown skin, flesh white. Not hardy North. **2 to 3 feet, \$1.75 each; 10 for \$15.00**

AFTER PLANTING**

LOMBARDY POPLAR (*Populus nigra italica*)

A tall, spirelike tree used for screens and formal plantings. It is fast growing, distinctly ornamental and beautiful. **Prices: 5 to 6 ft., \$1.00 each. 6 to 8 ft., \$1.25 each. 8 to 10 ft., \$1.75 each.**

LOMBARDY POPLAR
Tall and Stately

Harrisons' **STATELY PIN OAKS**

(*Quercus palustris*)

America's Favorite Oak Tree

The tree of trees—no other tree is more beautiful—once planted the Pin Oak continues to grow for a lifetime. Some of the finest, most attractive plantings depend almost entirely on the stately Pin Oak for their landscape appeal.

Beautiful Bronze Color During Autumn

Deeply cut, bright, fresh green foliage during the summer, turning to a bright bronze color during autumn. The most graceful tree for the lawn, equally as desirable for street or roadside planting.

YOU'LL NEVER REGRET PLANTING PIN OAKS.

Prices: 6 to 8 ft., \$3.75 each. 8 to 10 ft., \$5.00 each. 10 to 12 ft., \$7.00 each. 12 to 14 ft., \$10.00 each.

PIN OAK
For Permanence and Dignity

NORWAY MAPLE

(*Acer platanoides*)

Typical Maple leaves, large and bright green, fading to gold in the fall. Trunk and branches are sturdy and strong, lending an effect of ruggedness. Growth is fast. Branches and foliage are thick and compact, and the head, which is round-topped, begins to branch out not far above the ground. The tree is large—towering 50 feet high when fully grown. Splendid trees, most beautiful and desirable. For lining the sides of lanes and roads, for a lawn, to protect the house from sun and weather, for shade, for beauty and satisfaction, and for real permanent worth in all landscape planting there are no other trees in its class. Norway Maples are at home in the mountains, but will thrive at any elevation, and in nearly any soil to be found in this country. **Prices: 6 to 8 ft., \$3.00 each. 8 to 10 ft., \$4.00 each. 10 to 12 ft., \$5.50 each. 12 to 14 ft., \$8.00 each.**

NORWAY MAPLE

BABYLON WEeping WILLOW

(*Salix babylonica*)

A rapid growing, hardy tree, thriving in any moist soil. The Willows are valuable and interesting subjects on account of their graceful aspect. **Prices: 5 to 6 ft., \$1.50 each. 6 to 8 ft., \$2.25 each.**

CROSS COUNTRY PACKING

Our method of packing enables us to ship our shade trees thousands of miles with the trees arriving in field-fresh condition. We guarantee safe arrival no matter where you live.

Harrisons' Can Supply Shade Trees in Car Lots

We invite the City Forester of your Department of Parks; the District Engineer of your State Highway Commission and Landscape Architects to visit us at Berlin, Maryland, to see the Shade Trees growing in our nurseries.

Our tremendous production enables us to supply high quality Shade Trees at very low prices.

Beautiful blooms and blazing fall colors bring beauty to your garden! Flowers start opening in mid-August and continue until frosts. Flower buds are like red balls covered with white-green scales. When they open the guard petals emerge satiny, new state elaborately frilled and pleated. The new fruit, choice, 3 inches in diameter and of a beautiful, bright, bluish green color, most of the year. Inside, after standing in a cool place for a few days, the seeds are white and soft.

Planted 3 ft. apart, rate of maturity is about 90-100 days with a dark green with red veins in autumn, the whole tree blooming with red.

Price \$6.50 each

Only during 2 to 3 ft., \$3.50 each

HARRISONS' DECORATIVE EVERGREENS

Our Splendid Trees Embellish the Grounds of Beautiful Homes the Country Over

Pyramidal Arbor-Vitae

(*Thuja occidentalis pyramidalis*)

A really beautiful evergreen that should be included in every planting. It grows tall and narrow, requires no trimming, and retains its bright green color throughout the whole year. A pair of them placed at the entrance or at the corner of a home makes a superb showing. Our pyramidal arbor-vitae are grown with extreme care and each one is a specimen. **Prices: 18 to 24 inch, \$2.25 each; 2 to 3 ft., \$3.00 each; 3 to 4 ft., \$4.25 each.**

Compact Globular Arbor-Vitae

(*Thuja occidentalis compacta*)

Natural compact, globe-shape, dark green foliage. The ideal low-growing plant for massing against the taller evergreens in foundation plantings. **Prices: 12 to 15 inch, \$1.75 each; 15 to 18 inch, \$2.25 each; 18 to 24 inch, \$3.00 each.**

The Charming Irish Juniper

(*Juniperus communis hibernica*)

Forms a narrow and dense column, compact, bluish green foliage. Most attractive when planted around foundation of a home, at corners and entrances. Widely used in formal gardens. **Prices: 18 to 24 inch, \$2.00 each; 2 to 3 ft., \$2.75 each; 3 to 4 ft., \$3.75 each; 4 to 5 ft., \$5.00 each.**

ALL EVERGREENS MOSS BALLED

All evergreens are taken up expertly to secure the tender roots, the soil removed, and then the roots dipped in Transplantone and balled in wet moss and wrapped. By this method we are now able to eliminate 50 to 60 pounds of soil, making low cost express shipments possible. This method also insures excellent growth and quicker root action. In planting remove wrapping and use moss in hole around roots. If desired balled in soil and burlap, add \$1.50 per plant to cover additional handling and special packing

IRISH JUNIPER

COMPACT GLOBULAR ARBOR-VITAE

PYRAMIDAL ARBOR-VITAE

Berckmann's Golden Arbor-Vitae

(*Biota aurea nana*)

Dwarf, compact evergreens. Foliage a bright lustrous yellow. Fine for adding color in the planting. Highly admired by all who see it. **Prices: 12 to 15 inch, \$2.00; 15 to 18 inch, \$2.50; 18 to 24 inch, \$3.50.**

Spiny Greek Juniper

Upright columnar habit and bluish green foliage. The growth is so slow that the tree is well adapted for foundation plantings and other situations requiring dwarf trees. **Prices: 12 to 15 inch, \$2.00 each; 15 to 18 inch, \$2.50 each; 18 to 24 inch, \$3.50 each; 2 to 3 ft., \$4.75 each.**

Spreading Yew

(*Taxus cuspidata*)

The beautiful Yew of moderate bushy growth, usually grows wider than it does tall, starts branching from the bottom, developing into a bush form. The spreading branches are densely clothed with short leaves of dull green. It is the most attractive spreading evergreen, will grow in semi-shady locations. Hardest of all Yews. By trimming the side branches the plant can be made to grow semi-upright and likewise by trimming the top branches the plant can be made to develop lower to the ground. Can also be trimmed into globe shape. **Prices: 12 to 15 inch, \$2.50 each; 15 to 18 inch, \$3.00 each; 18 to 24 inch, \$4.00 each.**

Do Not Confuse Harrison's Hi-Quality Evergreens with Bed-Grown Stock. This Type of Stock May be as Tall as the Plants We Offer, They Do Not Have the Body and Are Useless for Immediate Landscape Effect and Oftentimes Require Several Years' Growth Before They are Satisfactory.

Harrison Grown Evergreens are Famous for Quality, Vigor and Beauty

American BOXWOOD

GROWN BY HARRISON BROTHERS
BERLIN, MARYLAND

Steps Out Ahead

—the real Aristocrat of the Evergreen family

YOU CAN SECURE THE FINEST SPECIMENS IN AMERICA FROM HARRISONS'

Possibly no evergreen shrub has been so much used for marking the boundaries of formal gardens, to outline flower beds, for low hedges, and for other ornamental purposes. The plants will adapt themselves to almost any situation and climate, and by judicious pruning can be trained to many forms.

Compact—Deep Glossy Leaves

Our Boxwood has deep glossy green leaves. They are dense, compact specimens, having been sheared many times. The leaves

on this variety are small and resemble the dwarf English Boxwood. This variety grows faster than the English Boxwood. For those who want large Boxwood plants in a few years, this is the best variety to plant.

Let's Plant More
American BOXWOOD

(*Buxus Sempervirens*)

A BROTHER OF
"YE OLDE ENGLISH" BOXWOOD
—It Grows Much Faster

PRICES OF AMERICAN BOXWOOD

12 to 15 inch, \$2.00. 15 to 18 inch, \$2.50.

The Colorful PEONIES

They Rival the Rose

Once planted they last for years. There are many beautiful peonies in every yard. Their large, bright colored flowers bloom in May and June, turning into beautiful flowers for the home.

Can supply following colors: White, Pink, Red. State color desired.

Prices: 75c each; 3 for \$1.95; 10 for \$5.50.

AMERICAN BOXWOOD

HARDY VINES

NATURE'S DRAPERIES

BOSTON or JAPANESE IVY (*Ampelopsis veitchii*). A popular climber, clinging firmly to brick, stone or other material. Deep, glossy, green, ivy-shaped foliage. Turns to cream and gold color in autumn. Price: 75c each.

CHINESE WISTARIA. A rampant growing climbing vine. Blue flowers in large drooping clusters during May and June. Price: \$1.25 each.

ENGLISH IVY (*Hedera Helix*). The most popular evergreen vine; large, deep green, glossy foliage. Excellent for covering walls. Useful for shady locations. Price: 75c each.

HALL'S HONEYSUCKLE. Deep glossy green foliage; fragrant flowers from July to fall. Price: 60c each.

SWEET AUTUMN CLEMATIS (*Clematis paniculata*). A splendid climber for covering porches and trellises. Flowers snowy white; produced in immense quantities during late summer and autumn. Price: 75c each.

SILVER LACE VINE. A beautiful climber. A cloud of lacy, misty foliage with flowers of cream and pale pink. Price: \$1.00 each.

AMI QUINARD. Very dark crimson-maroon, semi-double flowers. One of the darkest Roses grown and under certain conditions appear to be black. Very free bloomer, healthy grower. Most spectacular dark Rose.

CONDESA DE SASTAGO. Marvelously colored Rose with large cupped flowers of coppery red inside and rich yellow outside. A prolific bloomer at all times, keeps well when cut and is very fragrant. Compares with the Radiance Rose in vigor and hardiness.

ETOILE DE HOLLANDE. At present considered most beautiful of crimson hybrid teas. Velvety scarlet-crimson with enormous petals. It charms continuously with its brilliant color, vigorous growth, and well-formed flowers on long stems. Features.

GOLDEN DAWN. Considered the finest yellow Rose. Blooms with lemon-yellow tinted with old rose markings, long-lasting fragrance of real tea scent. Hardy, bushy, medium height, and very vigorous.

KAISERIN AUGUSTE VIKTORIA. Perfect creamy white bloom, slightly tinged with lemon, large and full. Long shapely buds open to full-petaled, deliciously scented bloom. An old favorite that even today has not been surpassed.

MRS. CHAS. BELL. A delicate, refined shell-pink shade, intensely fragrant. Very vigorous, tall and bushy. A sport of the ever-popular Pink Radiance, and sometimes called "Shell-Pink Radiance." An exquisite Rose that should be in every garden.

MRS. E. P. THOM. Deep yellow buds, with carmine markings, opening to semi-double, clear lemon-yellow, never fading blooms. Similar to Souv. de Claudius Pernet, being among the best yellows, grown successfully throughout the United States.

MRS. PIERRE S. DU PONT. Medium sized reddish gold buds open to a semi-double golden yellow that is a glorious sight from early summer until freezing weather. Moderately fragrant. Vigorous, compact, glossy foliage. The "ace" of the golden yellow Roses.

PINK RADIANCE. A brilliant carmine-pink with yellow shading at base of petals, having a light silvery tone on the inside, and deeper on the outside. Vigorous, free bloomer, parent of Red Radiance. Among the oldest Roses, it has made good everywhere.

PRES. HERBERT HOOVER. One of the outstanding Roses. A glorious new Rose of vivid cerise-red toned with yellow, orange and scarlet richly perfumed and free flowering.

RED RADIANCE. A sport of the famous Radiance and identical in all characteristics except color. A brilliant cerise-red color, and intensely fragrant. Tall and bushy, healthy foliage and excellent blooming qualities. The favorite red Rose of America's millions.

TALISMAN. A multi-colored glorious combination of orange, yellow and rose-red. They simply eclipse other Roses in autumn. Fine for decoration and cutting. The triple-tone flowers are produced all season.

Paul's Scarlet Climber

Large, intense scarlet blooms; freely produced. It is strong and perfectly hardy. The most popular climbing Rose. Same price as other varieties of Roses.

ENGLISH IVY—Evergreen

AZALEA—A Miracle of Loveliness

AZALEA AMOENA

Rosy Purple Flowers—Evergreen Foliage

A dense dwarf growing shrub with slender branches and semi-double flowers of a bright rosy purple color. Evergreen foliage that makes it very attractive when out of bloom. Grows satisfactorily in shade as well as in full sunlight. More hardy than the other kinds and its wealth of bloom in the early spring is a delight to everyone who sees it. **12 to 15 inch, \$3.00 each.**

BERBERIS JULIANAE. A beautiful and rare evergreen variety. It stays perfectly green during the winter and blends well with other evergreens and broad-leaved evergreens.

	Each
1 1/2 to 2 ft.	\$1.75
2 to 3 ft.	2.25
3 to 4 ft.	3.00

LIGUSTRUM LUCIDUM. Large thick, shiny dark green leaves, white flowers, black berries in winter.

	Each
1 1/2 to 2 feet	\$2.75

AZALEA HINODEGIRI

Deep Coral-Pink Flowers

Azalea hinodegiri is a dwarf grower with evergreen foliage. In the spring it produces a profusion of deep coral-colored blossoms, completely hiding the foliage. Ideally suited for planting around the foundation of homes or adding color in front of evergreens. Grows well in the shade or sunlight.

	Each
6 to 8 inch	\$1.25
8 to 10 inch	1.65
10 to 12 inch	2.25
12 to 15 inch	3.00

SOUTHERN MAGNOLIA (*Magnolia grandiflora*). The finest large growing broad-leaved evergreen tree. Large glossy leaves, handsome white flowers during summer. Trees grow pyramidal in form and often attain 20 feet or more in height. Its flowers are followed by large pods covered with brilliant red seeds.

	Each
3 to 4 feet	\$4.50
4 to 5 feet	6.00

AZALEA HINODEGIRI—The Spring Beauty

DWARF ENGLISH BOXWOOD

(*Buxus Sempervirens Suffruticosa*)

A widely known and popular form of dwarf Boxwood. It has small deep green dense leaves which hold their bright color throughout the winter months. Suitable for very low hedges and edgings; can be trimmed in various forms.

Easy to Grow. Dwarf English Boxwood is easy to grow and will thrive in most every type of soil. After this plant once becomes established, it does not require any particular attention. It is practically immune from all diseases and insects. Can be planted in the full sunlight and semi-shady locations.

Large Specimen Plants Sell at High Prices. Dwarf English Boxwood has been called the "Century" plant, due to its ability to live over a hundred years. A few years ago, large plants sold for fabulous prices, many selling for hundreds of dollars.

Ideal for Dwarf Hedges. Make your home grounds the show place of your community. Dwarf English Boxwood is the ideal low growing plant to add the finishing touches to your home grounds. It stays green all winter and provides your planting with year around beauty. Can be trimmed if desired, but not necessary, unless you want the strictly formal effect.

Yews or Taxus

Beautiful Rich Green - All Year
Hardy, Disease - Resistant, Long - Lived

IRISH-YEW *taxus baccata Hibernica*

Fine Soft Lustrous Foliage

An ARISTOCRAT from OLD IRELAND

This evergreen is the aristocratic member of the Yew family. It grows tall and narrow with stout, crowded branches and spirally arranged leaves which are dark green in color. This Yew is very scarce, but everyone who sees it is enthusiastic about it. Formerly it was imported from Europe, but after all importations were discontinued by the Federal Government, American nurserymen were unable to supply their customers. Fortunately, we had some specimen plants in our nurseries from which we were able to propagate.

BEAUTIFUL RETINOSPORAS

Dainty and Feathery—So Picturesque in the Foundation or Rockery

PLUME-LIKE RETINOSPORA (*Retinospora plumosa*). A handsome evergreen with feathery, light green foliage more beautiful than a fern. Excellent for foundation plantings; can be kept pruned to any desired height.

VEITCH'S SILVER RETINOSPORA (*Retinospora squarrosa veitchii*). Foliage silvery blue, feathery and dense, giving a soft, woolly appearance. Broad, pyramidal outline, can be kept to any height by trimming. One of the best retinosporas.

GOLDEN PLUME-LIKE RETINOSPORA

Our Most Popular Golden Tinted Evergreen

A handsome golden colored evergreen that is admired by all. Its pleasing shade provides the right amount of contrast when it is planted along with other evergreens along its side or back of it. Feathery, fernlike foliage can be kept trimmed to any size. No home foundation plantings are complete without this remarkable healthy evergreen.

Grow Better Fruit with Harrison's Select-Certified Trees and Plants

TRUE TO NAME

The World's Foremost Fruit Variety Identification Specialists Have Examined Harrison-Grown Trees and Pronounced Them True-To-Name

In addition to carefully selecting the propagating wood from bearing trees of superior strains, we have also employed the services of Dr. A. P. French, Dr. O. C. Roberts and Dr. L. Southwick, Professors of Pomology of Massachusetts State College, Amherst, Mass. These men are the world's foremost fruit identification specialists and they have pronounced our trees true to name.

3 to 4 feet	Each 3.75

ALL EVERGREENS—MOSS BALLED

All evergreens are taken up expertly to secure the tender roots, the soil removed, and then the roots dipped in Transplantone and balled and wrapped in wet moss. By this method we are now able to eliminate 50 to 60 pounds of soil, making low cost express shipments possible. This method also insures excellent growth and quicker root action. In planting, remove wrapping and use moss in hole around roots. If desired balled in soil and burlapped add \$1.50 per plant to cover additional cost of handling and special packing.

Hansen's Improved

Bush Cherry

An Ornamental shrub producing delicious fruit. Very easy to grow, highly productive and hardy. The fruit is large, black and sweet, wonderful to eat right from the bush. Introduced by Dr. Hansen of the South Dakota Experimental Station. Leaves are silvery green, turning to red in autumn. Attractive white blossoms add to landscape effect.

3-yr. Bushes, Bearing Size\$1.50 each

THE FAMOUS CALIFORNIA PRIVET—The Best Low Cost Hedge—Grown by Harrison Brothers, Berlin, Maryland

California Privet is the Leading Low Cost Hedge Plant

CALIFORNIA PRIVET (*Ligustrum ovalifolium*)

This is the universal hedge in the East, a fact proving that Privet has greater merit under ordinary conditions for this purpose than any other plant. For live fences at village, town and country homes it is the very best of all materials. On public grounds of all kinds, parks and cemeteries, along roads and paths, on factory grounds, and on newly subdivided areas near towns, nothing else can be used in its place, and in this place it is indispensable. It is the best of all hardy hedge plants. Can be easily kept at any height desired; has glossy, deep green leaves, and holds them until late fall. Its strong, quick, upright growth makes it useful for screening out unsightly objects.

HOW TO PLANT

California Privet grows faster than any other hedge plant. For a thick hedge close to the ground the plants must be set close together about 6 to 12 inches apart. Plow or dig a trench about 1 foot deep and 1½ to 2 feet wide. The plants should be planted deep enough so that the soil covers about the first three inches of the lowest branches. Fill around the plants with top soil and firm the soil. Water thoroughly after planting. Cut plants back to about 4 inches from the ground after planting; this will result in a dense hedge at the bottom of the plants. After hedge reaches desired height it can be kept trimmed so as to remain at that height.

2-3 ft.35	.25	.18
3-4 ft.45	.35	.25

SPIRAEA VAN HOUTTEI

This grand shrub has done more to beautify the homes of America than any other variety. It is valuable as a specimen in groups in border planting and for hedges. The branches are slender, drooping, covered with white flowers in April or early May. It grows in any place either in full sunlight or partial shade. Disease resistant, hardy, thrives under adverse conditions. Ultimate height 6 to 8 feet but can be kept lower by trimming. The most popular shrub. We have an extra fine supply of first class plants this year and are pricing them especially low.

2 to 3 feet80	2.25	7.00
3 to 4 feet	1.00	2.85	9.00

GREEN BARBERRY (*Berberis thunbergii*)

The best low dense hedge plant grown. Its abundant, small light green leaves, which turn to rich colors in autumn, and its wealth of scarlet berries make it very attractive. Extremely hardy and requires but little pruning. Ornamental and graceful the whole year.

PRICES PER EACH PLANT

	1 to 9 Plants	10 to 49 Plants	50 or More Plants

SPIRAEA VAN HOUTTEI
Always Makes an Attractive Hedge

BUSH ARBUTUS (*Abelia grandiflora*)

One of our beautiful, popular and satisfactory Broad-Leaved Evergreens. The graceful, drooping stems and branches are covered with dark, glossy leaves, which in winter assume a metallic sheen. From the middle of June until frost, this plant produces an immense quantity of tubular-shaped white flowers tinged with pink, about an inch long, which are borne in clusters. Good for shade. Ideal for hedges.
